

INSTRUCTIONS FOR ORDERING PARTS

- To eliminate error and speed delivery:
1. Write your NAME and ADDRESS on your order PLAINLY.
 2. Explain WHERE and HOW to make shipment.
 3. GIVE MODEL NAME, NUMBER, and SERIAL NUMBER that is stamped on the NAME PLATE of your product.
 4. Order from your PARTS LIST as this is the ONLY means we have of identifying the parts you need. Order by QUANTITY DESIRED, the PART NUMBER, and the description OF PART.
 5. Order your parts from your LOCAL M-C DEALER or DISTRIBUTOR.
 6. INSPECT ALL SHIPMENTS ON RECEIPT. If any parts are damaged or missing, file a claim with the carrier before accepting.
 7. Do not return parts to Mathews Company without a "Return Goods Authorization" from the factory. A list of all returned parts, a letter of explanation, and your name and address should be included with the shipment. TRANSPORTATION CHARGES MUST BE PREPAID.

**OWNERS NOTICE**

TO INSURE WARRANTY CLAIMS, BE CERTAIN TO FILL OUT AND MAIL WARRANTY CARD WITHIN 30 DAYS.

NOTE: The Company reserves the right to incorporate any changes in design without obligation to make these changes on units previously sold.

665EM DRYER CUT-AWAY

IGNITION

OPERATION

Upon a call for heat, power is applied to the control board, creating the spark and powering the gas valve. Electronic timing allows the system to continue to spark and hold the gas valve open for a specified trial for ignition period (approx. 7 seconds). If a flame is not present at the end of the trial for ignition period, the system will lockout. If a flame is present, the system will continue to operate, provided the electrodes are immersed in the flame.

In the spark source, a capacitor is charged and discharged rapidly through the primary of high voltage transformer. The current to charge the capacitor also energizes the valve control circuit so that as long as this action continues, the valve will remain open. The capacitor is discharged by a solid state switch, triggered by a neon circuit.

The flame detector monitors the spark current and the flame conductance to ground. If the spark of the flame is not present, feedback to the spark source removes power from the valve control circuit.

LOCATION OF ELECTRODE TIP

The electrode assembly should be located so that the tips are inside the flame envelope and about $\frac{1}{2}$ inch above the base of the flame. **IMPORTANT:** Ceramic insulator should not be within or close to the flame pattern. Study the illustration before positioning the electrodes.

NOTE: Electrode assemblies are precision components and should not be adjusted or disassembled. Electrodes should have a gap spacing of $0.125 (+ or -) 0.032"$. If this spacing is not correct, return the electrode assembly to the factory for replacement. Electrodes within their ceramic casing are NOT field adjustable. Adjust only the electrode mounting bracket. **WARNING: HIGH VOLTAGE.**

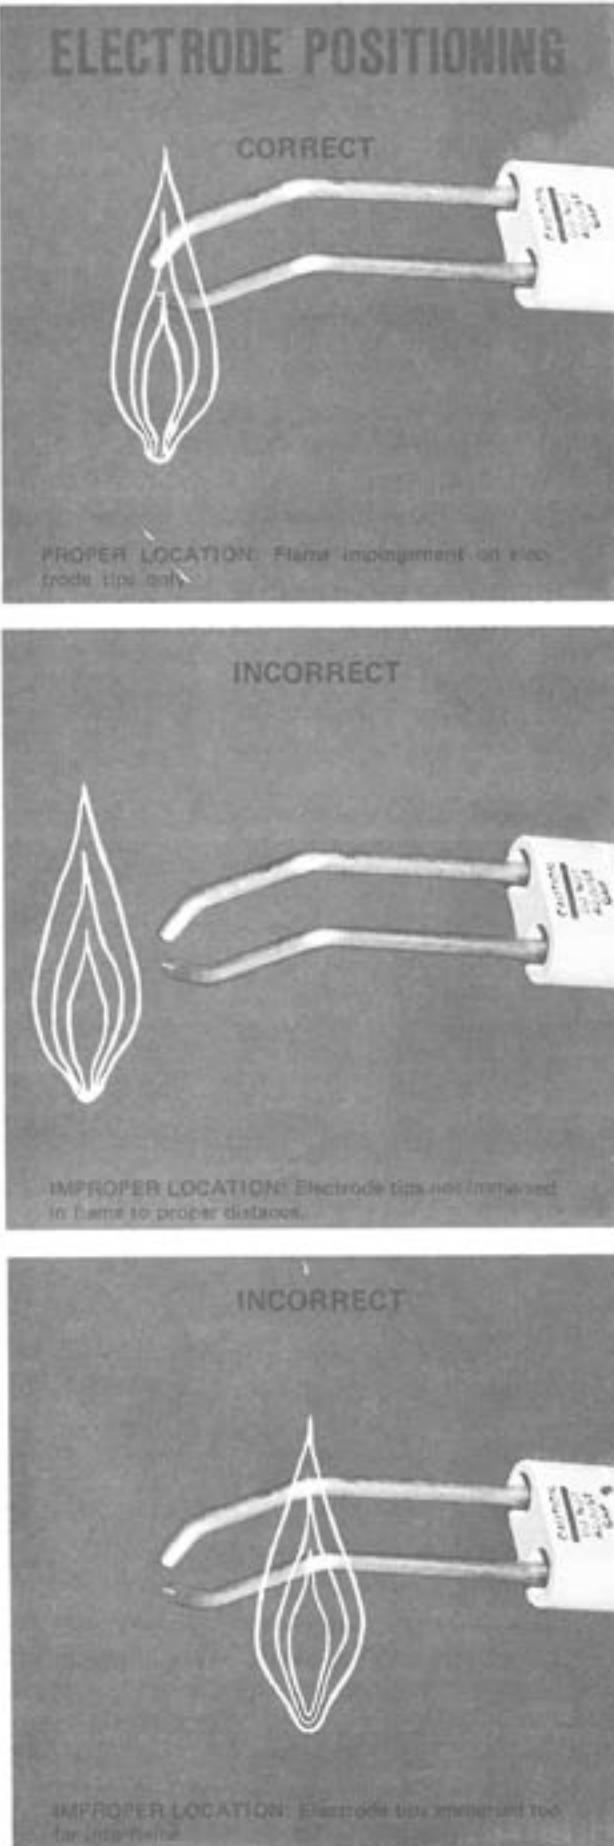

SAFETY CHECKS

- Manually shut off the gas supply and apply power to the control board. The system shall lockout after the trial for ignition period. Check that there is no voltage output between terminals B and V2 using a suitable voltmeter or neon tester.
- Manually open the gas valve and apply power to the control unit. The system shall lockout after the trial for ignition period and there shall be no voltage between terminals B and V2 under the following conditions:
 - The low voltage electrode is shorted to the ground.
 - The high voltage electrode is shorted to the ground.
 - The electrodes are shorted together.

NOTE
Recycle system before each test.

REPAIRS

The Ignition System is not field repairable. Faulty units should be returned to the factory for repair or replacement.

LEVEL AUGER AND HOPPER ASSEMBLY

Refer to Level Auger Assembly Drawing, Page 6.

The wet holding hopper and the level auger must be assembled on the site.

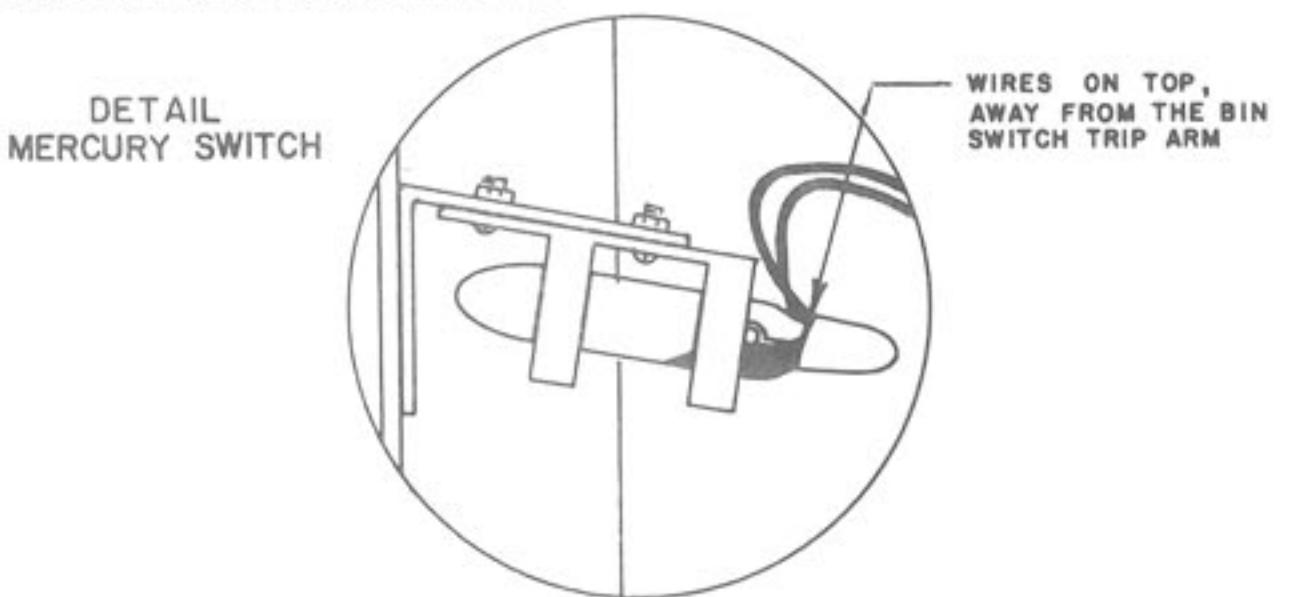

1. Bolt hopper side panels and hinges (Refs. 27 & 28) in place using $\frac{3}{8}$ " x 1" bolts and $\frac{3}{8}$ " whiz nuts. NOTE: Be sure the joiner tie straps (Refs. 16) are in place between the hopper panel and in the center hole at the bottom of each hopper panel.
2. Bolt the front end hopper panel (Ref. 1) in place using $\frac{3}{8}$ " x 1" bolts and $\frac{3}{8}$ " whiz nuts. At this time, do not put bolts in the top holes or bottom holes of the vertical seams. The belt guard will be bolted at these hole locations later.
3. The auger front shaft (Ref. 6) should be bolted into the level auger front section (Ref. 4). Insert the auger shaft through the bearing in the front end panel, but do not tighten the set screws on the bearing at this time.
4. The center auger shaft (Ref. 7) should be bolted into the auger section. Slide the center hanger bearing support assembly (Ref. 5) onto the shaft and bolt the support to the tops of the side hopper cross braces (Ref. 15) are in place before bolting down the bearing support with $\frac{3}{8}$ " x 1" bolts and $\frac{3}{8}$ " whiz nuts. The bottoms of the cross braces will bolt to two angles that are mounted at the bottom of hopper area.
5. Slide the rear auger section (Ref. 17) over the center auger shaft (Ref. 7) and bolt together with $2\frac{1}{8}$ " x 2" Grade 5 bolts and $\frac{3}{8}$ " lock nuts. Be sure the flightings from the two auger sections match up and are aligned properly.
6. The auger rear shaft (Ref. 8) should be bolted into the rear auger section. Slide the bearing and rear hopper end panel (Ref. 1) over the shaft and bolt the end panel in place with $\frac{3}{8}$ " x 1" bolts and $\frac{3}{8}$ " whiz nuts.
7. After checking clearance and alignment, the auger end bearings can be tightened to the front and rear auger shafts.
8. Bolt the receiving hopper (Ref. 9) in place using $\frac{3}{8}$ " x 1" bolts and $\frac{3}{8}$ " whiz nuts.
9. Bolt the level switch assembly (Ref. 10) in place using $\frac{3}{8}$ " x 1" bolts and $\frac{3}{8}$ " whiz nuts. Bring the two-wire cord up from the junction box near the level auger motor and connect the two wires to the terminal strip in the level switch assembly.
10. Mount the level auger pulley, bushing, key and belt (Refs. 12, 13, 14 and 20). Align pulleys and lock onto motor shaft.
11. Adjust motor mount for proper belt tension with the two motor mount adjusting bolts.
12. Install belt guard and secure with $\frac{3}{8}$ " x 1" bolts and $\frac{3}{8}$ " whiz nuts through the holes left open in step 2.

WARNING

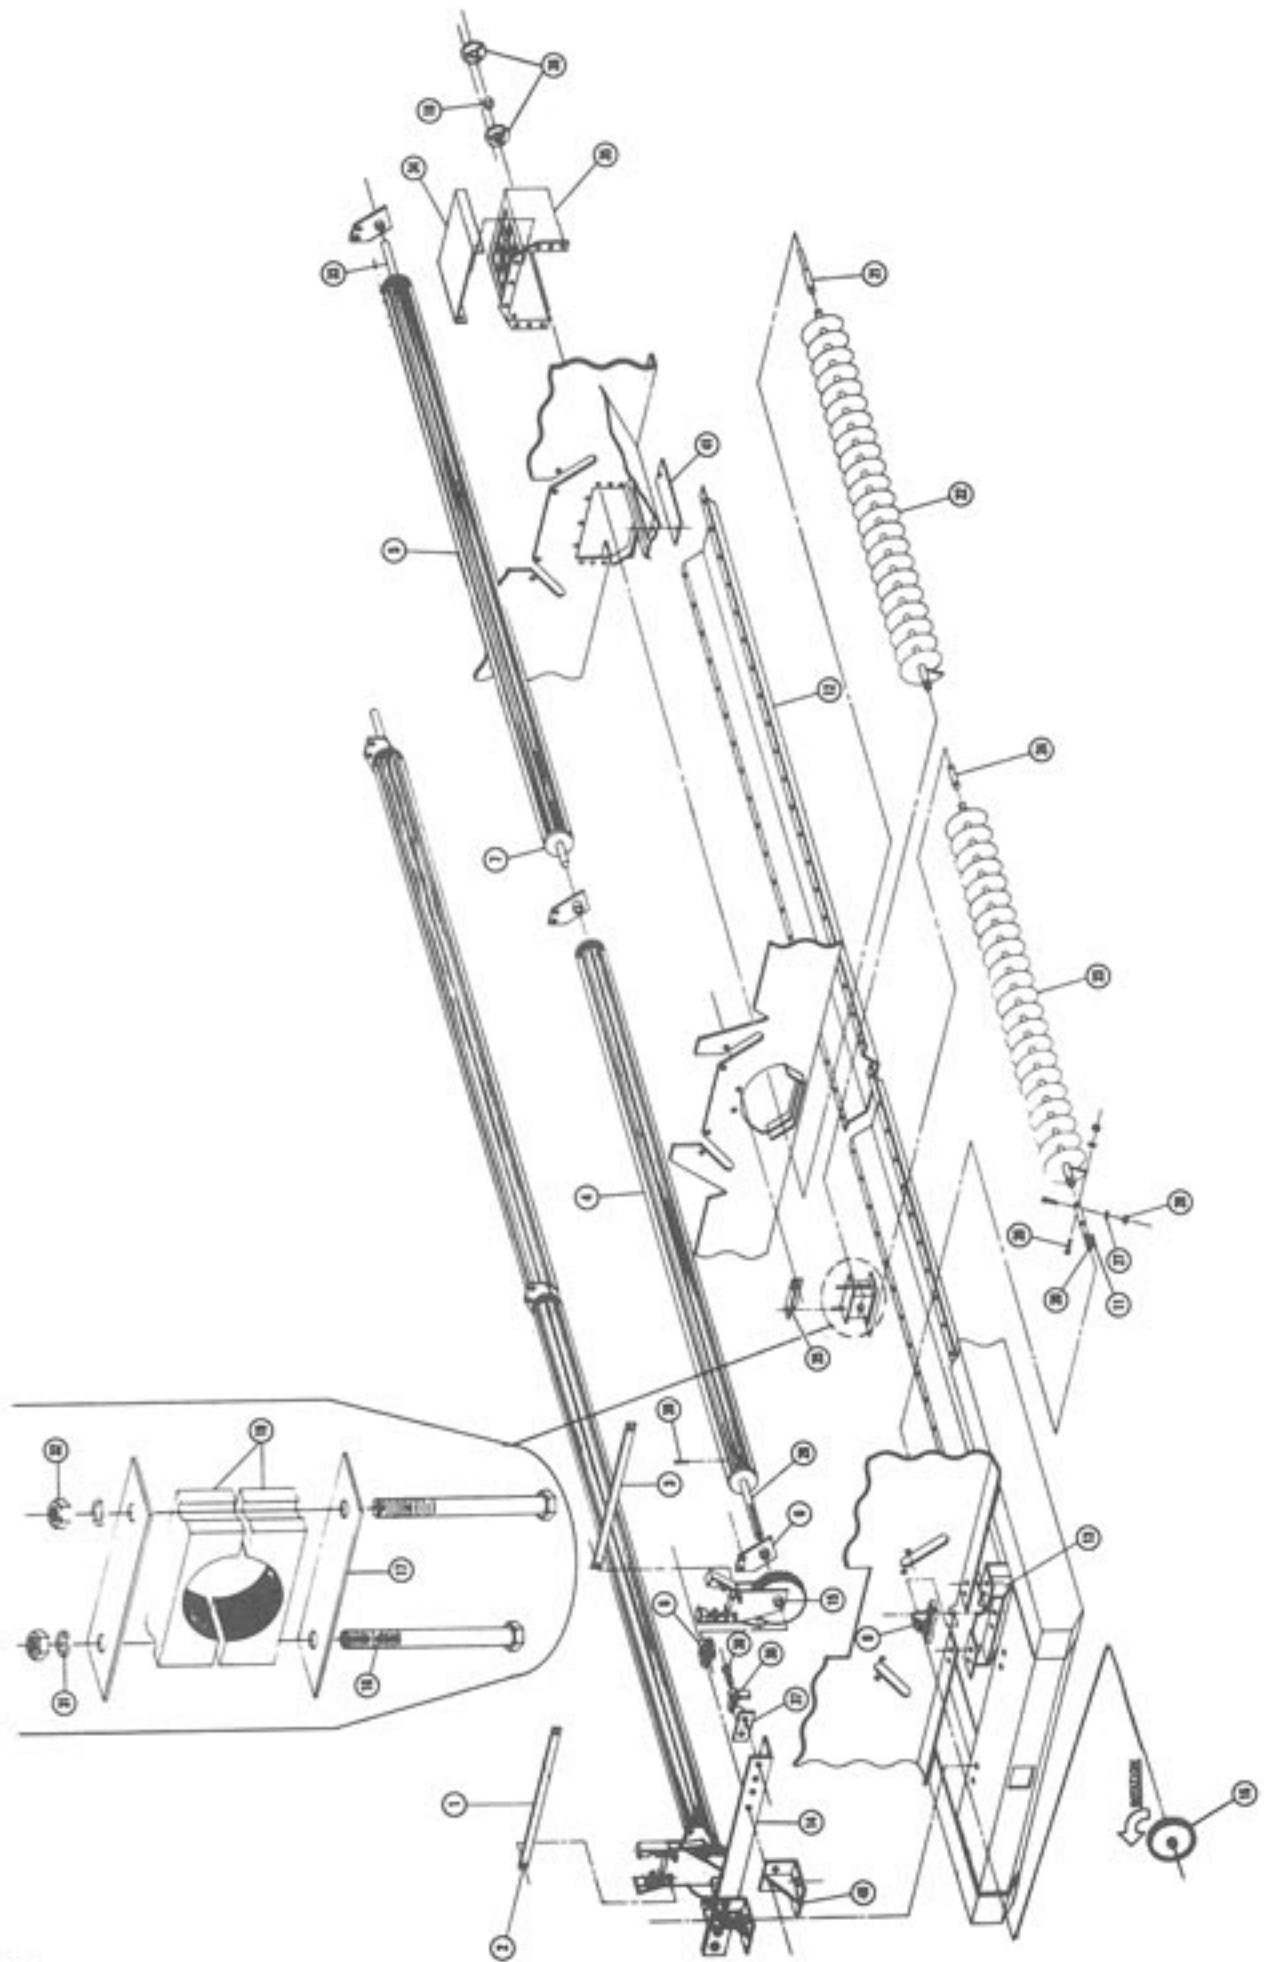

Do not make any adjustments on the mercury switch with the electric power turned on, as any movement of the mercury switch could start the level auger. With the bin switch trip arm hanging straight down, the mercury switch mounting bracket should be bent so the mercury in the glass bulb just runs down and makes contact with the two forks in the wire end of the bulb.

20	0008110	5/16-18 x 1 1/2" HHCS

OPERATION OF DOUBLE RATCHET SYSTEM

- The Outer Ratchet Pawls will be activated by two different switch positions.
 (A) When the Automatic Moisture Control Toggle Switch is in the MANUAL position (located on control panel).
 (B) When the Automatic Moisture Control Toggle Switch is in the AUTOMATIC position and the grain is warm and dry enough to activate the independent Moisture Controls located on each side of the dryer.
- The Inner Ratchet Pawls engage only when the Automatic Moisture Control Toggle Switch is in the AUTOMATIC position.
- The Inner and Outer Ratchet Pawls are disengaged when the Automatic Moisture Control Toggle Switch is in the "OFF" position.
- The Inner Ratchet Pawls are set to engage one less notch than the Outer Ratchet Pawl (when Outer Ratchet Pawl engages one notch, the Inner Ratchet Pawls engage none).
- When drying extremely high moisture grain (approx. 30% and higher), we recommend setting the Outer Ratchet Pawls on the metering rolls to engage one notch per stroke. They are set at the factory for two notches. To change amount of notches, see Operating Instructions, Step 18 (A).
- The dryer operates at its best when the Outer Ratchet Pawls operate approximately 90% of the time. This will vary according to weather and grain conditions.

ELECTRODE ASSEMBLY

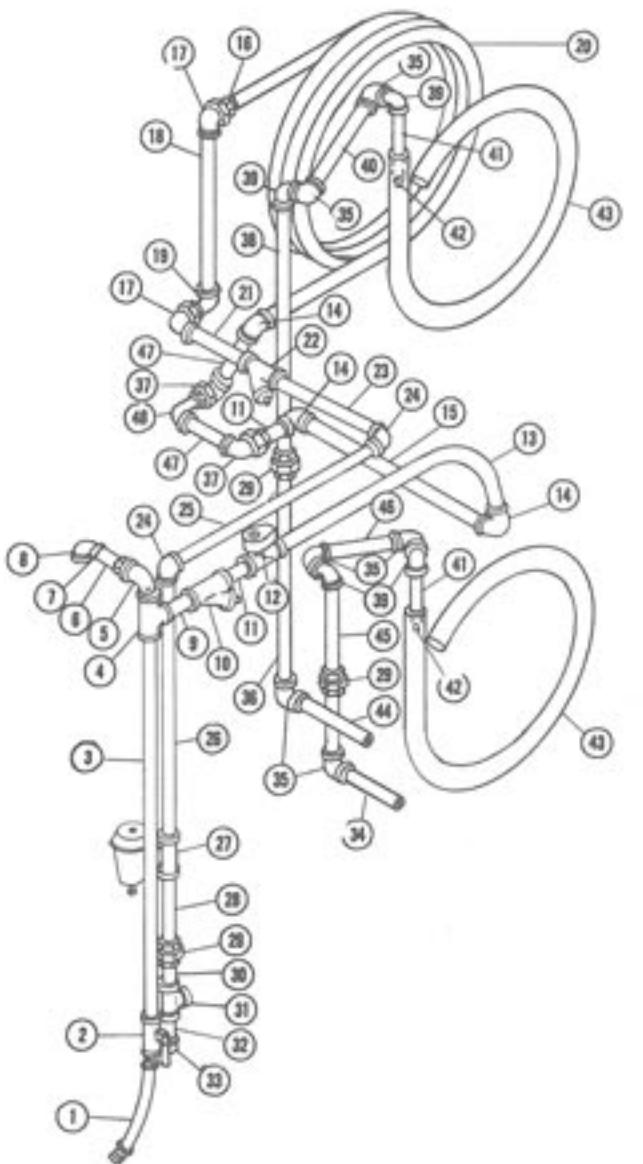

REF.	PART #	DESCRIPTION
1	1216926	Electrode
2	1282658	Electrode Mount
3	0008227	3/8-16 x 2 3/4 HHCS F.T.
4	0008174	3/8" Flatwasher
5	0008168	3/8-16 Whiz Nut
6	0008280	6-32 x 3/8 Slotted Mach. Screw
7	0008185	6-32 Whiz Nut
8	1281544	72" Secondary Wire for Lower Burner
	1211545	36" Secondary Wire for Upper Burner
9	1281543	72" Ignition Wire for Upper Burner
	1211544	36" Ignition Wire for Lower Burner

SAFETY GUARDS

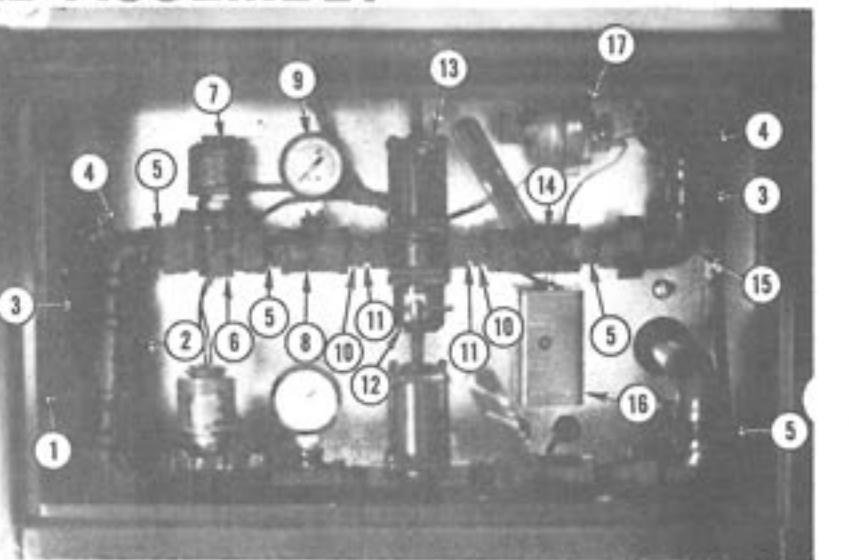

665 L.P. PIPING

REF.	PART #	DESCRIPTION
1	1217005	1/2" Inlet Hose
2	1217015	1/2" Liquid Line Hand Valve
3	1288036	1/2 x 28 1/2" Nipple - Extra Heavy
4	1218035	1/2" Tee - Extra Heavy
5	1218071	1/2" Street Elbow - Extra Heavy
6	1217013	Relief Valve
7	1217014	Relief Valve Adapter
8	1218048	1/2" Street Elbow - Standard
9	1208047	1/2 x 2" Nipple - Extra Heavy
10	1237007	1/2" Strainer
11	1288048	1/2 x 2 1/2" Nipple - Extra Heavy
12	1257082	1/2" Liquid Line Solenoid
13	1227001	110V. Replacement Coil
14	1285779	1/2" Nipple With Bend
15	1218036	1/2" x 90° Elbow - Extra Heavy
16	1278002	1/2 x 15" Nipple - Extra Heavy
17	1218029	1/2" to 3/4" Reducing Bushing
18	1288019	3/4" x 90° Union Elbow - Extra Heavy
19	1218097	3/4 x 20 1/2" Nipple - Extra Heavy
20	1258063	3/4" Street Elbow - Extra Heavy
21	1210393	3-Ring Vaporizer
22	1218005	3/4 x 1 1/2" Nipple - Extra Heavy
23	1218060	1/2" Strainer
24	1218051	3/4 x 17" Nipple - Extra Heavy
25	1218027	3/4" x 90° Elbow - Extra Heavy
26	1218080	3/4" x 20" Nipple - Extra Heavy
27	1258064	3/4" x 19 1/2" Nipple - Extra Heavy
28	1217006	3/4" Regulator
29	1218096	3/4" x 4" Nipple - Standard
30	1218028	3/4" Union - Standard
31	1218007	3/4" x Close Nipple - Standard
32	1218070	3/4" Tee - Standard
33	1218077	3/4" x 2" Nipple - Standard
34	1218050	3/4" Pipe Cap
35	1258062	3/4" x 7 1/2" Nipple - Standard
36	1218074	3/4" x 90° Elbow - Standard
37	1288050	3/4" x 14" Nipple - Standard
38	1288010	1/2" Union Elbow - Extra Heavy
39	1218040	3/4" x 24 1/4" Nipple - Standard
40	1218033	3/4" Street Elbow - Standard
41	1218049	3/4" x 6 1/2" Nipple - Standard
42	1217529	Burner Inlet Pipe
43	0215711	Burner Nozzle
44	1210132	Ring Burner Weldment
45	1218002	3/4" x 2 1/2" Nipple - Standard
46	1218089	3/4" x 5" Nipple - Standard
47	1288049	3/4" x 10 1/2" Nipple - Standard
48	1218025	1/2" x 3 1/2" Nipple - Extra Heavy
	1218071	1/2" Street Elbow - Extra Heavy

MANIFOLD ASSEMBLY

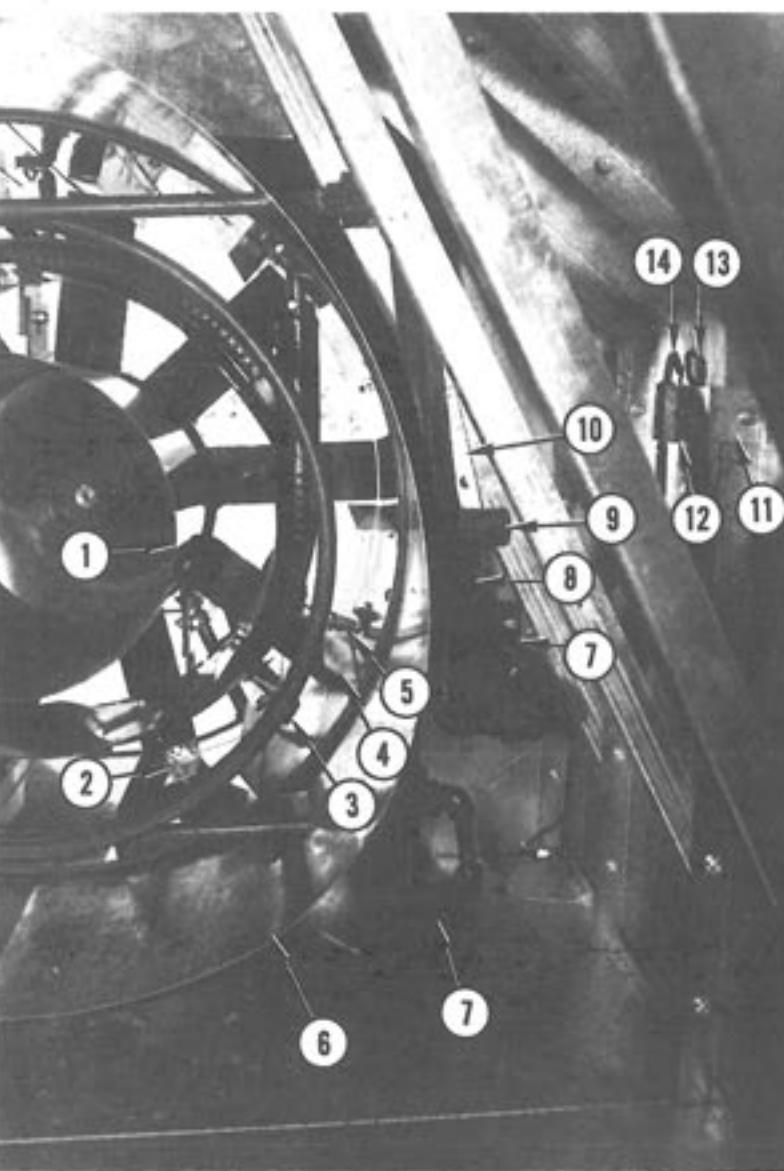

REF.	PART #	DESCRIPTION
1	1218096	3/4" x 4 Nipple Std.
2	1218070	3/4" Tee Std.
3	1218077	3/4" x 2 Nipple Std.
4	1218074	3/4" Elbow Std.
5	1218007	3/4" x Close Nipple Std.
6	1217002	3/4" Solenoid (L.P. Gas)
7	1237000	1/4" Solenoid (Nat. Gas)
7	1227001	3/4" 110V. Solenoid Replacement Coil
8	1227011	1/4" 110V. Solenoid Replacement Coil
8	1238092	3/4 x 3/4 x 1/4 Tee Std.
9	1207002	Pressure Valve
10	1218029	3/4" x 1/2 Bushing
11	1218013	1/2 x Close Nipple Std.
12	1227002	Power Element 90° To 210° "B" Std.
12	1227014	Power Element 140° To 250° "D" Opt.
13	1217012	1/2" Modulating Valve
14	1217011	1/4" Main Hand Valve
15	1288039	1/4" Union Elbow Std.
16	1217018	High Limit Switch For Lower Burner
17	1216849	Air Pressure Switch For Lower Burner

NOTE: Opposite branch of manifold for lower burner consists of the same part as upper branch, unless otherwise indicated.

Page 11

INNER VIEW OF TOP BURNER

REF.	PART NO.	DESCRIPTION
* 1	1210131	Air Stabilizer Weldment
* 2	1281407	Electrode Assembly
3	1244442	Vaporizer Mount Bracket
* 4	0212845	Air Straightener
* 5	1213459	Burner Mounting Bracket
* 6	1282930	Orifice Extention
* 7	1210081	3/4" Pipe Seal Plate
* 8	1210169	High Limit Shield
* 9	1212007	Air Pressure Tube Weldment
* 10	1212007	Air Pressure Tube Bracket
* 11	1212883	Sensing Bulb Bracket
* 12	1212882	Sensing Bulb Clip
* 13	1227002	Modulating Sensing Bulb
* 14	NPN	Thermometer Sensing Bulb

NOTE: Sensing bulbs must be mounted in this position.

*Also used in bottom burner assembly.
All of the above parts are used in the lower section burner except Ref. #3.
